

# LUVISH GULATI

+91-9871295854 | Domlur, Bengaluru | [Gulatiluvish@gmail.com](mailto:Gulatiluvish@gmail.com) | [LinkedIn](#)

## PROFILE

Product-minded software engineer with experience across software development, product management, client-facing consulting, and hands-on AI engineering. Builds and ships AI agents, Voice AI, RAG, automation, mobile, web, and backend systems from discovery and technical design through development, launch, testing, and analytics.

## EXPERIENCE

**GrowthX** | Bengaluru, Karnataka

Jun 2026 - Present

### Software Engineering Intern

- **Owned product and engineering delivery end to end** while working directly with founders, from user discovery, prioritization, requirements, and system design through implementation, launch, experimentation, production reliability, and Mixpanel analytics.
- **Designed the notification architecture for GrowthX's Slack-like community messaging platform** across React Native/Expo, Next.js, Convex, backend services, and Firebase Cloud Messaging (FCM), covering mobile push, in-app alerts, web push, and user preferences.
- **Owned notifications end to end** for community messages, channel joins, photo/video messages, quick mute, email digests, and mobile read/unread states, making the experience consistent across web and mobile.
- **Automated notification QA and internal workflows** with an ADB test framework covering 53 of 57 notification scenarios, saving about 2 days of QA. Also led the app-install campaign across member emails.

**Pink Unicorn Algorithms (Globerra.com)** | Delhi NCR

Aug 2025 - May 2026

### Associate Product Manager

- **Owned product strategy and delivery across three products** - CarbonNex, Rapidero, and Risk AI Council - turning client and business needs into PRDs, roadmaps, user flows, release scopes, and clear plans for design and engineering teams.
- **Designed the core workflows for CarbonNex and Rapidero**, including ESG reporting, six logistics modules, and automated shipment pricing; reduced more than 4 hours of daily manual work and removed manual rate-lookup errors.
- **Led GTM and served as Content Lead for Risk AI Council**, defining target users, launch messaging, website structure, learning programs, and content across six AI risk categories aligned with NIST AI RMF and EU AI Act principles.
- **Built and deployed custom client-facing Voice AI agents via GetVocal.ai** for real business workflows, designing dialogue flows, prompt architecture, intent handling, and conversational experiences with direct client/stakeholder collaboration.

**Cvent India Pvt. Ltd.** | Gurugram, Haryana

Jun 2025 - Aug 2025

### Associate Product Consultant - Intern

- **Worked directly with enterprise clients across 10+ accounts**, understood their event setup and workflow problems, resolved product issues, and guided them on using Cvent's platform effectively.
- **Mapped client journeys across Cvent's product suite**, including Registration, Attendee Hub, Supplier Network, and Onsite Solutions, then turned repeated client needs into clear product briefs and improvement ideas for the core product team.
- **Proposed an AI customer-support solution** that could answer common questions, connect with CRM data, route complex cases, and resolve routine issues; presented a phased product plan to leadership.

## KEY PROJECTS

### Henry - AI Digital Twin & Personal Work Automation Agent | [GitHub](#)

- **Built Henry**, a CLI-based personal work automation agent with a RAG layer for project-manager knowledge that reduces context switching across code reviews, Slack, Telegram, email, meetings, and follow-ups while keeping work moving when I am unavailable.
- **Reviews code changes and drafts review feedback** by summarizing updates, finding bugs and edge cases, and checking unresolved comments.
- **Built two-way communication through a Telegram bridge** and drafts Slack replies and emails in my voice using my writing style, priorities, project context, and memory.
- **Acts as a project manager** by collecting stand-up updates, tracking tasks and blockers, following up on pending actions, preparing status updates, scheduling meetings, and surfacing decisions that need my input.

### Kelly - Local-First Voice AI & Agentic Quotation Assistant | [GitHub](#)

- **Designed and built Kelly**, a locally run Voice AI and agentic assistant for electrical-shop catalogue and quotation workflows using TypeScript, Codex orchestration, RAG, persistent memory, and tool-driven execution.
- **Built retrieval and agent tooling around catalogue ingestion and quotation generation** with PDF/XLSX/CSV inputs, vector search, deterministic pricing, approval gates, and an MCP-based Excel connector for safe local workbook operations.
- **Designed Kelly for reliable local-first agent execution** with isolated customer context, durable memory, review workflows, and structured tool use to keep AI-generated actions grounded in business data.

## EDUCATION

**B.Tech, Computer Science** — Amity University Uttar Pradesh

2021 - 2025

## SKILLS

**Product & Client:** Product Discovery, PRDs, Roadmapping, Prioritization, GTM, User Journeys, Client-Facing Communication, Stakeholder Management, Mixpanel, Agile/Scrum

**Languages & Frontend:** JavaScript, TypeScript, Python, React Native, Expo, Next.js, Flutter, HTML, CSS

**Backend & Data:** Convex, Flask, REST APIs, MongoDB, MySQL, SQLite, Firebase, Vector Search, Embeddings

**AI Agents & Voice AI:** LLMs, Agentic AI, AI Agents, Voice AI, Conversational AI, RAG, LangChain, LangGraph, MCP, Tool Calling, Agent Memory, Prompt Engineering, LLM Orchestration

**Engineering & Tools:** System Design, API Integration, Workflow Automation, Git, GitHub, Postman, Jira, ADB, Automated Testing, Production Deployment
